SKILLS

- **Languages:** Python, Go, Java, TypeScript
- **Cloud & DevOps:** AWS, GCP, Kubernetes, Docker, Terraform, Distributed Systems
- **Data & Databases:** Kafka, Flink, Spark, PostgreSQL
- **Monitoring & Observability:** Prometheus, Grafana, OpenTelemetry
- **Frameworks:** React, Node.js, FastAPI

EXPERIENCE

Google

Software Engineer II

Mountain View, CA

Jan 2022 – Present

- Architected and implemented robust real-time **distributed data pipelines** using **Kafka** and **Flink**, processing over 500 million events daily, ensuring 99.9% data availability for critical analytics.
- Spearheaded a 6-engineer team in the end-to-end development and deployment of a new developer tooling feature, resulting in adoption by over 2,000 internal users and a 15% reduction in development cycle time.
- Analyzed and optimized complex **PostgreSQL** queries and indexing strategies, reducing p99 latency from 800ms to 120ms (an 85% improvement) for a high-traffic service, enhancing user experience.

Stripe

Software Engineer

Remote

Jun 2019 – Dec 2021

- Managed and enhanced critical payment reconciliation microservices built on **Go** and **Python**, reliably processing over \$2 billion in annual transaction volume with 99.99% accuracy.
- Implemented proactive anomaly detection systems integrated with **Prometheus** and **Grafana** dashboards, decreasing on-call incidents by 35% and improving system stability across **distributed systems**.

EDUCATION

UC Berkeley

B.S. Computer Science

Berkeley, CA

Jan 2014 – Dec 2018

- GPA: 3.8/4.0
